

Amortización Máxima = 4'345.91

SF₃ = 14'000

Monto a refinanciar = 14'000 - 4'345.91 = 9'654.09

d)

$i = 3.5\%$

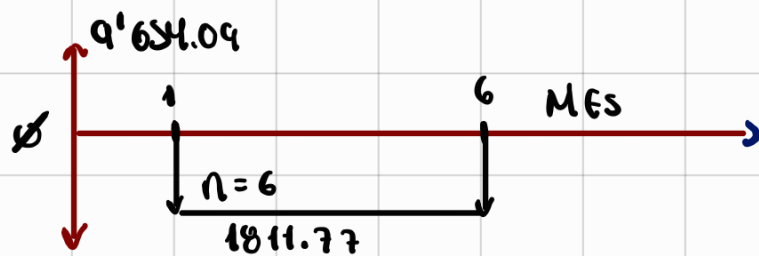

$n = 6$

A

$z > t = 0: 9'654.09 = A(P/A, 3.5\%, 6)$

$A = 1'811.77_p$

DFC. Refinanciamiento → "costo financiero"

Caso de pago en cuotas iniciales

$2.5\% \cdot 9'654.09$
= 241.35

$t = 0: 9'654.09 = 241.35 + 1'811.77(P/A, i; 6)$

$i = 4.28\% \text{ mensual}$

e) TEB = 5%

bim	SI	Amort	Int.	Cuota	SF
1	35,000	7,000	1,750	8,750	28,000
2	28,000	7,000	1,400	8,400	21,000
3	21,000	7,000	1,050	8,050	14,000
4	14,000	7,000	700	7,700	7,000
5	7,000	7,000	350	7,350	0

TEB = $\frac{36\%}{6} = 6\%$

bim	SI	Amort	Int.	Cuota	SF
4	14,000	7,000	793.19	7,793.19	7,000
5	7,000	7,000	420	7,420	0

Handwritten calculations on the right:

20 Mes → TEB = 5%
40 Mes → TEB = 6%

$19,000(P/A, 5\%, 20) - 19,000 = 229.55$
 $19,229.55$

$19,229.55(P/A, 6\%, 40) - 19,229.55 = 513.14$
 743.19

Crédito Comercial

✓ Tipo de financiamiento → directo con proveedor → equipo/mobiliario

✓ Información directa y errónea → "3" → FLAT

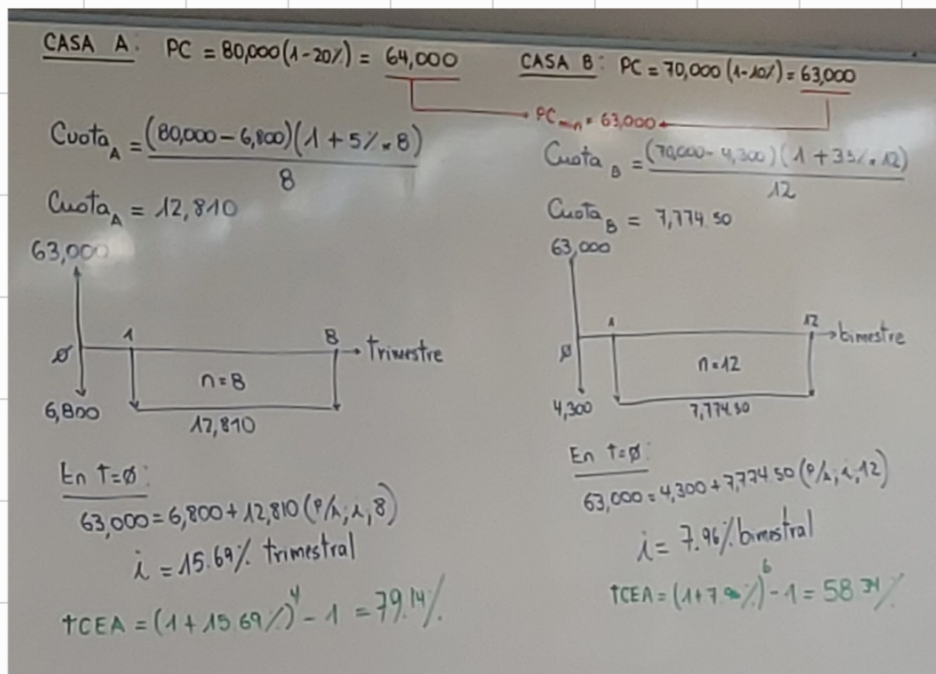

✓ Cuota constante = $\frac{D(1 + i_{fbo} \times n)}{n}$

Monto a financiar = Precio de Lista - cuota inicial

✓ Costo Financiero → DFC

Financia al contado → Precio al contado mínimo (PC_{min})

Financia al crédito → "n"

Comparación de tasas de Interés
